
PAWNECT

Connecting Every Paw to Care

PROTOTYPE FLOW MASTER DOCUMENT

India's Integrated Pet & Community Animal Healthcare Platform

Confidential Document — Not for external circulation without permission

Document Type:	Prototype Flow Master Document
Version:	Pre-MVP (Prototype)
Primary Goal:	Validate core workflows, user behaviour, clinical correctness, and ecosystem acceptance before MVP build
Prepared By:	PawNect
Date:	20/01/2026

PAWNECT — PROTOTYPE FLOW MASTER DOCUMENT

(Validation-Focused | Builder-Ready | Clinically Safe)

---

1. Global Product Principles

1.1 Platform Role

- PawNect is the system of record
- PawNect does not disrupt existing vet–lab economics
- PawNect digitizes workflows, records, and communication

1.2 Prototype Constraints

- No real payments
- No automation
- No analytics dashboards
- Manual status transitions only
- No revenue visibility for vets
- No emergency flows
- No AI / ML logic

---

2. User Roles

2.1 Pet Parent

- Discovers vets
- Books consultations
- Views reports & records
- Initiates preventive tests

2.2 Vet

- Manages consultations
- Orders diagnostics
- Reviews reports
- Provides medical guidance

2.3 Diagnostic Lab

- Receives test orders
- Updates status
- Uploads reports

Flow 1 — In-Clinic Appointment (Prototype)

A. Pet Parent Flow

A1. Pet Parent Home Interface

Primary CTAs

- **In-Clinic Appointment**
- Online Consultation
- Lab Tests
- Profile / My Pets

A2. Search & Discover Vets

Filters

- Specialization
- Experience
- Consultation fee (mock)
- Ratings (mock)
- Availability (Today / Tomorrow)

Sorting

- Ratings (High → Low)
- Fee (Low → High / High → Low)
- Experience (High → Low)

Vet Listing Card

- Name + photo
- Specialization & degree
- Clinic name & location
- Experience
- Rating
- Availability indicator
- CTA: **Book In-Clinic Appointment**

A3. Vet Profile Page

- Doctor bio
- Qualifications
- Areas of expertise
- Practice registration number
- Typical cases handled
- Consultation fee
- Clinic address
- Weekly availability
- CTA: **Book In-Clinic Appointment**

A4. Slot Selection

- Select date & time
- Slot status: Available / Booked (static)

A5. Verify Details

- Pet selection (dropdown)
- Pet parent details
- Clinic location
- Selected slot

A6. Confirmation

- Placeholder payment screen
- Booking confirmation (ID, vet, clinic, time)

A7. Post-Booking

Upcoming Appointments

- Vet name
- Clinic
- Date & time
- Status: Booked
- Actions: Cancel / Reschedule (UI only)

B. Vet Flow — In-Clinic

B1. Vet Dashboard

- Today's appointments
- Upcoming appointments

B2. Consult Screen

- Pet & parent details
- Reason for visit
- Previous consults

Vet Can

- Add vitals
- Add notes
- Provisional diagnosis
- Upload prescription

Next Actions

- Consultation Complete
- Recommend Diagnostics

C. Diagnostics — In-Clinic Collection

Vet Action

- Select tests
- Collection type: In-Clinic
- Lab: Vet-preferred OR PawNect auto-assign

Pet Parent Sees

- Tests ordered
- Single price
- Assigned lab
- Status updates

D. Lab Flow — In-Clinic

Manual status updates:

- Ordered
- Sample Collected
- Processing
- Report Uploaded

E. Report Flow

- Vet reviews report & adds advice
- Pet parent sees report + next steps

STATUS TRANSITIONS

Consult: Booked → In Progress → Completed → Closed
Diagnostics: Recommended → Sample Collected → Processing → Report Available → Reviewed

---

Flow 2 — Online Consultation (Prototype)

A. Pet Parent Flow

A1. Entry

CTA: **Online Consultation**

A2. Vet Discovery

Filters

- Specialization
- Experience
- Consultation fee (mock)
- Ratings (mock)
- Availability (Today / Tomorrow)

Sorting

- Ratings (High → Low)
- Fee (Low → High / High → Low)
- Experience (High → Low)

Vet Listing Card

- Name + photo
- Specialization & degree
- Clinic name & location
- Experience
- Rating
- Availability indicator
- CTA: **Book Online Consultation**

A3. Vet Profile Page

- Doctor bio
- Qualifications
- Areas of expertise
- Practice registration number
- Typical cases handled
- Consultation fee
- Clinic address
- Weekly availability
- CTA: **Book Online Consultation**

A3. Vet Profile (Online)

- Consultation modes (UI only)
- Availability calendar

- CTA: Book Online Consultation

A4. Pre-Consult Details

- Pet details
- Reason for consult
- Symptoms (optional)
- Contact details

A5. Confirmation

- Placeholder payment
- Appointment confirmation

B. Vet Flow — Online

Vet Can

- Add notes
- Diagnosis
- Prescription

Next Actions

- Consultation Complete
- Recommend Diagnostics

C. Diagnostics — Online (Home Collection Enabled)

Vet

- Select tests
- Allow home collection
- Optional recommended lab

Pet Parent

- Confirms diagnostic order
- Sees one price

Lab Assignment

- Handled by PawNect backend

D. Lab Flow — Home Collection

Manual status:

- Ordered
- Sample Scheduled
- Sample Collected
- Processing
- Report Uploaded

E. Report Flow

- Vet review & advice
- Pet parent sees report + follow-up options

Flow 3 — Preventive Lab Tests (Pet Parent–Initiated)

IMPORTANT CLINICAL GUARDRAIL

Preventive tests are for routine health monitoring only.
Illness diagnostics require vet consultation.

A. Pet Parent Flow

A1. Entry

CTA: **Lab Tests**

A2. Landing Page

- Preventive Health Tests
- Wellness Packages
- Individual Tests

A3. Select Test Type

Packages

- Basic Health Check
- Annual Wellness
- Senior Panel

Individual Tests

- CBC
- LFT
- KFT
- Thyroid

(Each shows price, sample type, CTA)

A4. Select Pet & Collection Type

- Pet selection
- Home collection OR In-clinic

A5. Lab Assignment

- No lab selection UI
- PawNect assigns lab internally

A6. Review & Confirm

- Placeholder payment
- Order confirmation

B. Lab Flow — Preventive

Status:

- Ordered
- Sample Scheduled
- Sample Collected

- Processing
- Report Uploaded

C. Report Flow

Pet parent sees:

- Report PDF
- Interpretation note
- CTA:
    - Book Online Consult
    - Book In-Clinic Appointment

Flow 4 — Home Visit (Mvp Only — Not Prototype)

Explicitly excluded from prototype

To be built in MVP:

- Vet-approved only
- Safety SOPs
- Higher pricing
- Emergency / non-transport cases

FINAL OUTCOME

This Master Document provides:

✅ One unified product philosophy
✅ Clear prototype boundaries
✅ Zero vet–lab conflict
✅ Clear revenue-ready logic
✅ Builder-ready flows
